

The AirTest from LCB food safety is a new tool for air

sampling and preventing airborne biocontamination in any type of food premises by qualifying and quantifying germs present in the environment. The AirTest has a flow rate of 100 l/minute and runs on an internal battery. There are five sampling volumes adjustable to 10, 50, 100, 250 and 500 litres. It is fitted with a sampling screen designed for 90mm diameter Petri dishes.
